WHITMAN DEMANDS DIRECT STATE TAX

Asks Legislature to Provide Only Funds for Necessary Expenses.

ALSO WANTS A SURPLUS

ALRANY, Feb. 24 .- Gov. Whitman called upon the Legislature to-day not only to provide for a direct tax of \$18.813.303 to meet \$10,813,303 State debts left over by the Glynn administration and \$8,000,000 for the sinking fund but also to arrange for additional indirect taxes to make permanent a Treasury surplus which the State Comptroller has contended should be \$5,000,000.

In a special message the Governor says the revenue and resources of the State Treasury for the fiscal year ending September 30 next total \$52,881,224 and that the expenditures which should have been provided for by the Glynn administration total \$63,694,527. Whereas the Glynn administration only appropriated \$47,889,527, thus deferring payment upon \$10,813,303, or "substanty the \$11,000,000 which it was med had been saved by the pre-

UNITED STATES CAN SUPPLY DYESTUFFS

Secretary Redfield Tells Senate Profitable Industry Can Be Built Up.

CONSUMPTION IS GROWING

dyestuff industry can be built up with legislative aid, in the opinion of Sec retary Redfield of the Department of Commerce. A resolution passed by the Senate directed the Secretary of Commerce to asceriain all the facts re-lating to the supply of dyestuffs for

American textile and other industries. This action was taken following wide spread complaint by American manufacturers that their supply of dyestuffs, which came chiefly from Germany, had been cut off by the war or was obtain-Secretary Redfield transmitted the re-

suits of his investigation to the Senate this afternoon. He finds that Germany has or had a practical monopoly of the dyestuffs derived from coal tar. He says the American consumption of ar-tificial dyestuffs has attained an annual value of \$15,000,000 and is growing steadily. The domestic production is valued at only about \$3,000,000 and this is based chiefly on the use of foreign materials or compounds.

American Users Crippled. Secretary Redfield, referring to the onditions since the war, says:
"The multitude of users in the Unite: States have been crippled in various ways, forced to change designs or aban-don certain products, or to revert to a temporary use of natural dvestuffs with all the accessory readjustment and revo-lution in dyeing processes. On every hand there is difficulty in meeting contract specifications and in making definite plans and agreements for the

future!

Secretary Redfield says that twenty-one German companies engaged in the dyestuff manufacture have a nominal capacity of over \$36,700,000 on which lividends average 22 per cent, and that cetual profits often reach 50 per cent.
Concerning the American establishments, Secretary Redfield says: "Investigations show that their advance be-yond certain limits in the manufacture of either intermediate or finished dyes is persistently checked and prevented by the united action of German producers in underselling. The entire German color industry is so completely organized and accustomed to act as a unit in furnishing the general interests at home and cbroad that little success in facing their
